REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious the overall claimed invention of a compression plate anastomosis apparatus for anastomosing an end of a graft vessel to a side of a receiving vessel together, comprising: a first compression plate opening having a perimeter defined by first holding means; the first holding means is shaped to hold receiving vessel portion in a configuration such that when the receiving vessel portion and the graft vessel portion are anastomosed together there is an uneven distribution of force against the receiving vessel portion around the receiving vessel opening caused by the shape of the first holding means and due to the inability of the second holding means to fully extend into any spaces of the first holding means, or wherein the first compression plate and the second compression plate have mated locking components to lock the compression plates together without requiring penetration through the receiving vessel by the mated locking components.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

2. The drawings were received on 25 August 2006. These drawings are accepted by the examiner.
